ANNUAL REPORT 2023

WELCOMING
COMPASSIONATE
NURTURING

A *Note* FROM OUR CO-DIRECTORS

Dear Roots Community,

What an exciting year 2023 was! **We realized two long-term dreams:** first, to move into a new space that is easily accessible for all and second, to hire an additional staff member focused on community outreach. In that same vein, we also had nursing student interns complete program evaluations for our support groups and we put what we learned into practice right away to best serve those who need us.

Roots celebrated our **7th anniversary** this January and we will host our 8th annual Moms Like Me storytelling and awareness-raising event this coming May.

With your support, we have provided **continuous care and programming for the community** throughout the upheaval of the past few years. By holding programs in person and online, we were able to show up for expectant and new parents during an already vulnerable time. And we will continue to do so! Through training and collaboration between medical providers, peer volunteers who share the ups and downs they've experienced themselves, and the expansion of services and growing understanding of the need to nurture those in this unique phase of life, Roots Family Collaborative is here for the perinatal community.

The transition into **parenthood is monumental** for 100% of people, and no one was meant to do it alone. We are proud to share with you the vital work that we are doing.

THANK YOU for supporting Roots and ensuring this vital support network stays strong!

With gratitude,

Kerry Williams
